MILK INSPECTION IS NO FUN

Incident Showing How Hard It Is to
Force Sanitary Rules on Dirty
People.

The trials and tribulations of a milk
inspector trying to force insanitary
people to live according to sanitary
rules are shown in the issue of the
Healthologist, the official organ of the
Milwaukee health department.
The story follows:

A Milwaukee milk inspector during
a farm inspection, came upon a place
hopelessly filthy, disorderly and run
down. A motherly person with a big
heart, but firm and weird convictions,
listened to the young man's sugges-
tions. Then looking over her spec-
tacles pityingly, she said:

"Boy, my mother was ninety-seven
years old when she died. She was
dirtier than I am, and lived in a
dirtier house and drank dirtier milk.
If she could stand it I guess there
ain't no reason why I and the city
folks that get milk from this farm
can't stand it too."

And not being able to answer that
argument, the milk inspector left her
—kindly withal, but yet voicing her
indignation over "them there new
fangled ideas of cleanliness."

Thousands Have Kidney Trouble and Never Suspect It.

How To Find Out.
Fill a bottle or common glass with your
water and let it stand twenty-four hours;
a brick dust sedi-
ment, or settling,
stringy or milky
appearance often
indicates an un-
healthy condi-
tion of the kid-
neys; too fre-
quent desire to
pass it or pain in
the back are also symptoms that tell you
the kidneys and bladder are out of order
and need attention.

What To Do.
There is comfort in the knowledge so
often expressed, that Dr. Kilmer's
Swamp-Root, the great kidney remedy,
fulfills almost every wish in correcting
rheumatism, pain in the back, kidneys,
liver, bladder and every part of the urinary
passage. Corrects inability to hold water
and scalding pain in passing it, or bad
effects following use of liquor, wine or
beer, and overcomes that unpleasant ne-
cessity of being compelled to go often
through the day, and to get up many
times during the night. The mild and
immediate effect of Swamp-Root is
soon realized. It stands the highest be-
cause of its remarkable
health restoring pro-
perties. If you need a
medicine you should
have the best. Sold by
druggists in fifty-cent
and one-dollar sizes.
You may have a sample bottle sent free
by mail. Address Dr. Kilmer & Co., Bingham-
ton, N. Y. Mention this paper and re-
member the name, Dr. Kilmer's Swamp-
Root, and the address, Binghamton,
N. Y., on every bottle.

LOSS OF INDEPENDENCE

Nag—I never speak of the Fourth
of July as Independence Day.
Stagg—Why not?
Nag—Why, I was married on that
day.

World That Was New to Her.
Tommy Conovan, a property man in
Cleveland, possesses among his per-
sonal "props" a number of amusing
stories. This is one of them:

"I used to be on the door at the Ly-
ceum. One night when Joseph Mur-
phy was playing there an old Irish
lady approached with a ticket in her
hand. Evidently she had never been
in a playhouse before and was some-
what bewildered. She watched the
line passing by me and listened as I
called out 'upstairs' or 'downstairs'
according to the tickets handed me.
Finally she slowly approached and
gave me her coupon.
"Upstairs," I called.
"Whisper," she said, as she leaned
toward me, 'can you tell me on what
floor I can see Joseph Murphy?'"

TASTING WINE FOR LIVING

Strange Calling Followed by Women
Born With Delicate Palates Is
Very Lucrative.

Of the list of strange callings fol-
lowed by women that of wine tasting
is one of the most curious and lucra-
tive. As a matter of fact, Mlle. Col-
linere, whose services are in great de-
mand in France, Germany and Italy
as a wine taster, is said to make an
income of about £5,000 a year, many
firms employing her for regular work
and frequently for special duty.

Only half a dozen wine tasters have
been known to history, the most re-
nowned of these being the wife of a
famous London wine merchant, Mme.
Pommery, who died in Paris twelve
years ago, and Signora Sousa, who has
a great reputation in Spain on ac-
count of her judgment and knowledge
of wine.

Wine tasters, it appears, are born,
not made, and must possess the gift
of a rare and delicate palate. To
this, of course, must be added a knowl-
edge of wines. Mlle. Collinere's taste
is so fine and her knowledge of wines
such that she can discern from the
first taste of a wine just where the
grapes grew from which it was made,
whether they were raised in California
or in the vineyards of France, Ger-
many, or elsewhere. She can easily
detect adulteration of any sort, or if
there is a blend and of which wines,
and can tell the age of a wine almost
to a day. As a matter of fact, there
are no secrets that a bottle of wine
can withhold from this remarkable
Frenchwoman once she has had a
spoonful of it in her mouth.

She does not swallow the wine. In
fact, she is a teetotaler, and if she
were to drink wine would lose her sub-
tle magic of taste. Furthermore, she
is obliged to take the greatest care
of her health. She must be well in
order to do her work, for her sense
loses its cunning when she gets out
of health.—Tit-Bits.

WHY WE DETEST PARASITES

Feeling of Instinctive Revulsion Is
Justified, for They Are Carriers
of Disease.

The feeling of instinctive revulsion
against parasites of all kinds which
characterizes humanity generally, and
which is due to something much more
than the mere pain or annoyance that
their bites might inflict, become more
interesting as further discoveries show
the role of insects in the spread of
disease.

Unfortunately this natural abhor-
rence has not been enough to protect
man under conditions of poverty and
uncleanliness from harboring such pa-
rasites, and now those who understand
how much more than a mere personal
annoyance is in question from the ex-
istence of parasites must take up the
problem to eradicate them.

The possibility of the bedbug con-
veying relapsing fever, typhoid and
leprosy has been suggested and ap-
parently there is no parasite of man
that may not be a mode of disease
conveyance. Flies, fleas, mosquitoes
and bugs not only are all under sus-
picion, but most of them are also
actually demonstrated as ordinary
and frequent conveyors of diseases of va-
rious kinds.

Health authorities must now take
up the problem of getting rid of in-
sect parasites in order to stamp out
disease. — From the Journal of the
American Medical Association.

POOR SORT OF HERO

"Is it a excitin' book, Jimmie?"
"Naw; it's dead slow! Here it is
de third chapter an 'he ain't killed but
eight or ten injuns so far!'"

Folly of Worry.
Worry is overwork of the most dis-
astrous kind; it means to drive the
mental machinery at an unreasonable
and dangerous rate. Worry gives the
brain no rest, but rather keeps the
delicate cells in constant and contin-
uous action. Work is wear; worry is
tear.
